

Orbit Announces Standard Intelsat Type Approval for its Innovative OrSat

OrSat - the world's only antenna system of its size - 1.15m ku-band - with both Intelsat and Eutelsat type approvals

Orbit announces Standard Intelsat Type Approval (GVF/IA 200FLT K2&G) for its innovative OrSat (AL-7103 MK II) Ku-Band Maritime Stabilized Antenna System.

Receiving the Eutelsat Type approval last year, along with this new significant Type Approval now awarded by Intelsat, further establishes Orbit's commitment to its clients and to providing them with cutting edge solutions - by which ensuring best satellite communications, along with the flexibility of cost effectiveness and time-saving. "These type approvals from the leading satellite companies are a significant step forward for Orbit", says Dr. Ehud Netzer, Orbit's CEO. "It demonstrates the uniqueness of the OrSat system and proves the capabilities, superiority and leadership of Orbit's technology", he further points out.

User friendly, flexible, and robust, this stable, all weather antenna continues to offer the largest gain possible for a 1.28m radome, and practically reduces operation expenses throughout the product's life cycle. Now with both approvals, its simple plug-and-play architecture and its cost effectiveness, Orbit's unique OrSat Ku-Band Maritime Stabilized Antenna System is even more attractive. During its first year the system is already deployed and operating on hundreds of platforms worldwide.

About Orbit:

Orbit Technology Group is a leading designer, developer and manufacturer of a wide range of Stabilized Satellite Communication Systems, enabling mobile platform-to-satellite connections.

Orbit has over 50 years of experience and reliable reputation in the field of advanced mobile SatCom & tracking antenna systems for air, marine and ground platforms, as well as audio management solutions for naval and airborne platforms.

Orbit's systems support broadband satellite communication such as: TV, Data, Internet (1 Mbps), Video, VoIP and more, delivering a full range of SatCom solutions for mobile air, land and marine platforms. The Company's solutions translate innovation into impeccable performance, reliability and operational functionality for defense and commercial deployments.

Orbit is a public company traded on the Tel Aviv Stock Exchange with a worldwide marketing net (including offices in the US, UK and Singapore) and international technical support centers around the globe, providing swift and reliable services.
